

## Free Trial Conversion

Free Trial versions of SetBilder are fully functional versions that have a 90-day license limitation. Free Trial version workbooks are indicated by the inclusion of “FT” in the workbook name. Lifetime License versions will not have “FT” in the workbook file name.

Upon purchasing a fully licensed version you will use the new Master Workbook to convert each one of your existing “FT” workbooks into fully licensed workbooks. There are 3 sets of “conversion Instructions shown below. All 3 Instruction Sets contain the same information – Pick whichever instruction set that you are more comfortable with:

- The condensed version or “Fast Track” Instructions are shown below
- The more in depth “Detailed” Instructions are shown on Page 2
- The “Step by Step Diagram” Instructions begin on Page 3

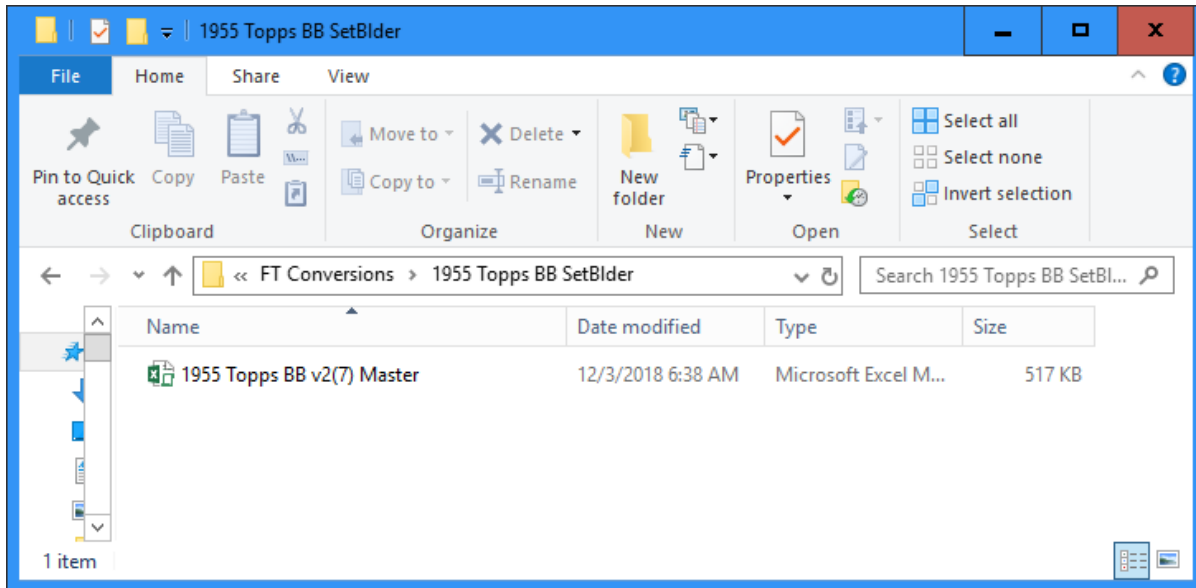

### Free Trial Conversion – “Fast Track” Instructions

- 1) Install the fully licensed version using the SetBilder Installer that you have just received. This will place your fully licensed Master Workbook in a folder on your PC Desktop.
- 2) Copy your existing Free Trial Workbooks (FT Versions) into your fully licensed SetBilder Folder on your PC Desktop.
- 3) Open your fully licensed Master Workbook and select “Update SetBilder Version” from the SetBilder Menu.
- 4) In the Dialog Box that opens - Select one of the FT versions that you have copied into the fully licensed SetBilder folder.
- 5) When the conversion process is complete – You will be asked to name and save the new workbook that you have just created.
- 6) Do this same process for each one of your existing FT workbooks.
- 7) When you have converted, renamed and saved all of your FT workbooks then open each one to verify that your set data looks correct.
- 8) Delete the entire FT Version Folder and each one of the remaining FT Version workbooks including your FT Master.
- 9) Done!

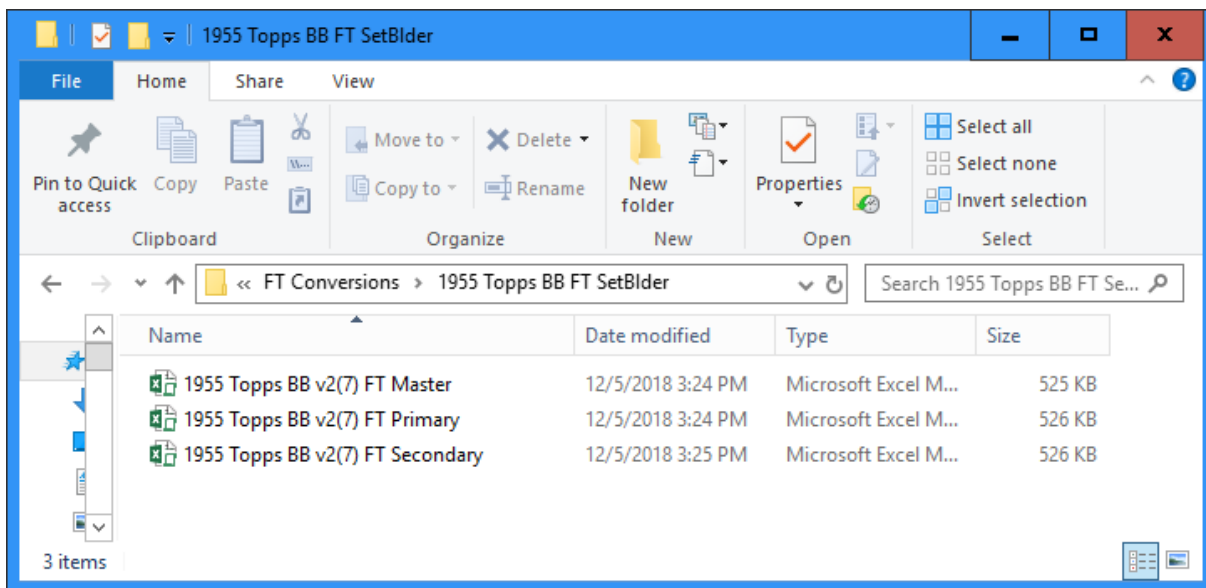

## Free Trial Conversion – “Detailed” Instructions

- 1) Install the fully licensed version using the SetBilder Installer that you have just received. This will place your fully licensed Master Workbook in a folder on your PC Desktop.
- 2) If you have made changes to either the “3<sup>rd</sup> Party Grading Scale Table” or the “Lower Grade Cards Relative Value Table” in your existing “FT” SetBilder Master, you may want to reflect those changes in the new fully licensed Master Workbook by doing one of the following:
  - a. Use the “Copy Table Changes” function in your Current “FT” version Master Workbook to copy those values over to the new Master Workbook as described in the User Guide **OR**
  - b. Manually enter those changes in to your new fully licensed Master Workbook
- 3) Copy each of your existing trial version working set workbooks (“FT”) from your trial version folder into the fully licensed version folder. (**right click on FT workbook > copy > navigate to fully licensed version folder > paste**)
- 4) Close any currently open Workbooks and open the fully licensed “SetBilder Master” workbook.
- 5) Click on the SetBilder Menu and select “Update SetBilder Version”.
- 6) You will be presented with a “File Open” dialog box.
- 7) Navigate to and Select the “FT” version set workbook that you want to convert.
- 8) The processing will import all of your existing set data from the selected “FT” Workbook into a fully licensed (non “FT”) working set workbook.
- 9) When the import has completed, you will be presented with a “Save As” dialog box which shows a pre-populated suggested workbook name consisting of (Set Name, Version Number, and “Your Desc”). For example, “1955 Topps v2(9) Your Desc”.
- 10) Modify “Your Desc” as needed to indicate the type of set (Primary, EXMT, NRMT, etc.) You can modify the pre-populated workbook name to whatever you wish but best practice would be to leave the Set Name and the Version Number as suggested so that the workbook can be easily identified. Note that for reference the name of the working set that you opened and are upgrading is shown in the Title Bar of the “Save As” dialog box.
- 11) Click “Save”.
- 12) Repeat this process for each one of your existing “FT” version workbooks except for your “FT” version Master.
- 13) Once you have completed the process of converting all of your existing “FT” working set workbooks into the fully licensed versions:
  - a. Open each one of your new working set workbooks and verify that you do not see the expiration message at the bottom of the main screen.
  - b. Having verified the update was successful, delete each one of your existing “FT” version workbooks including your “FT Master” as they will no longer be needed or functional.
  - c. Done!

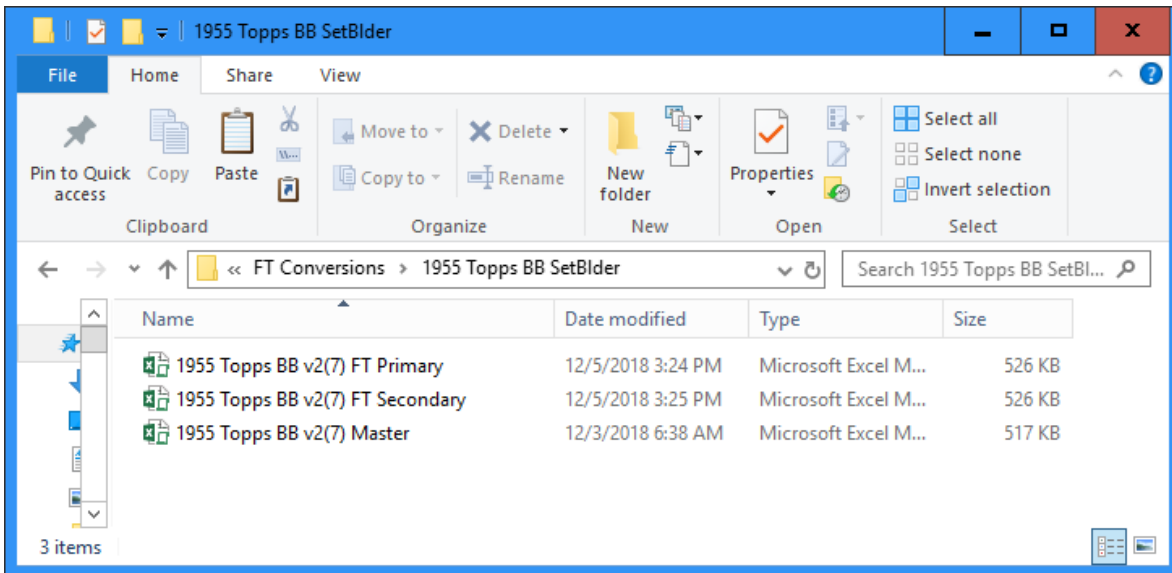

## Free Trial Conversion – “Step by Step Diagrams”

**Install the Licensed Version and Open the SetBlder Folder (where the New Master resides)**

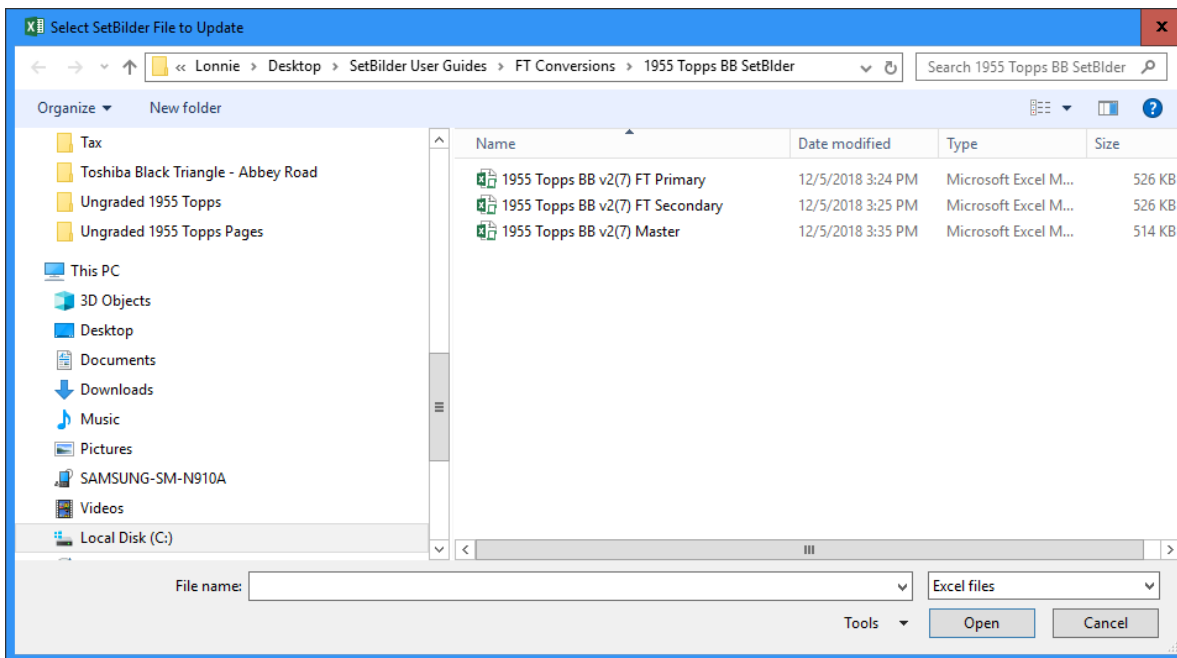

**Open your existing Free Trial (FT) Version Folder**

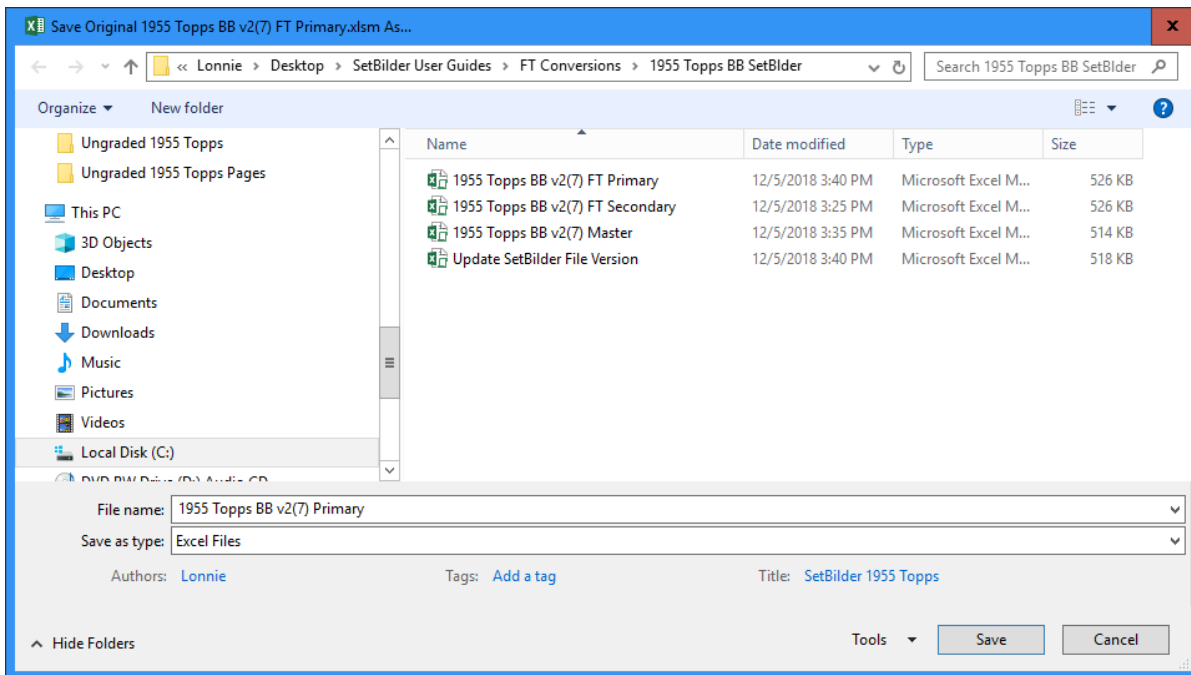

**Copy your FT Working Sets (not the FT Master) from your Free Trial Version Folder into the new Fully Licensed Version Folder**

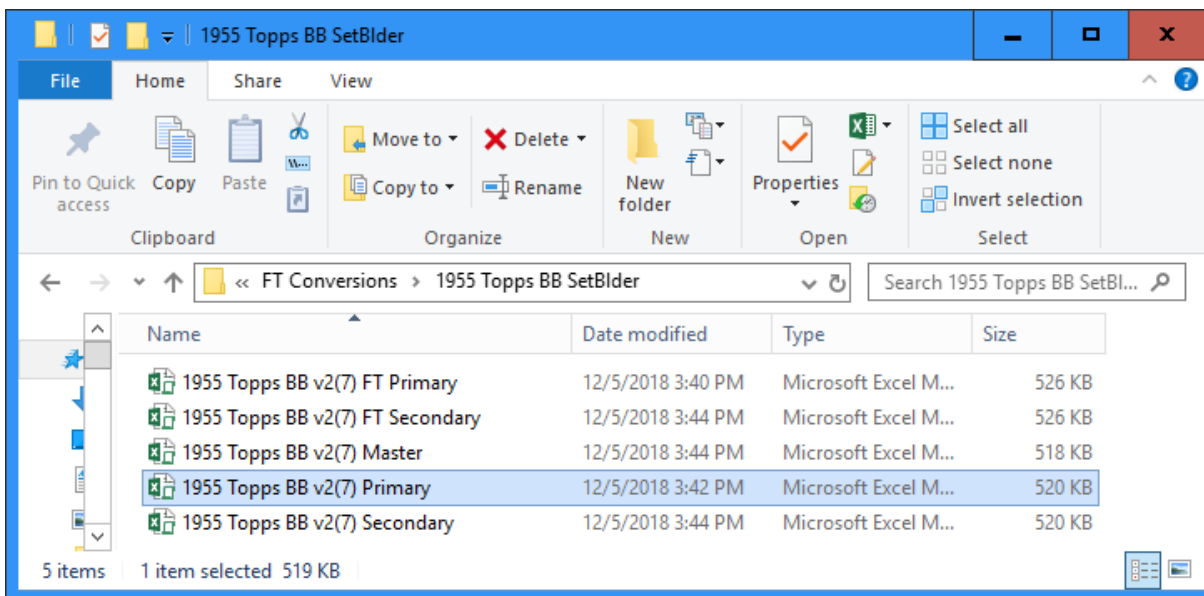

**Open the fully licensed Master Workbook and choose “Update SetBlder Version” from the SetBlder Menu**

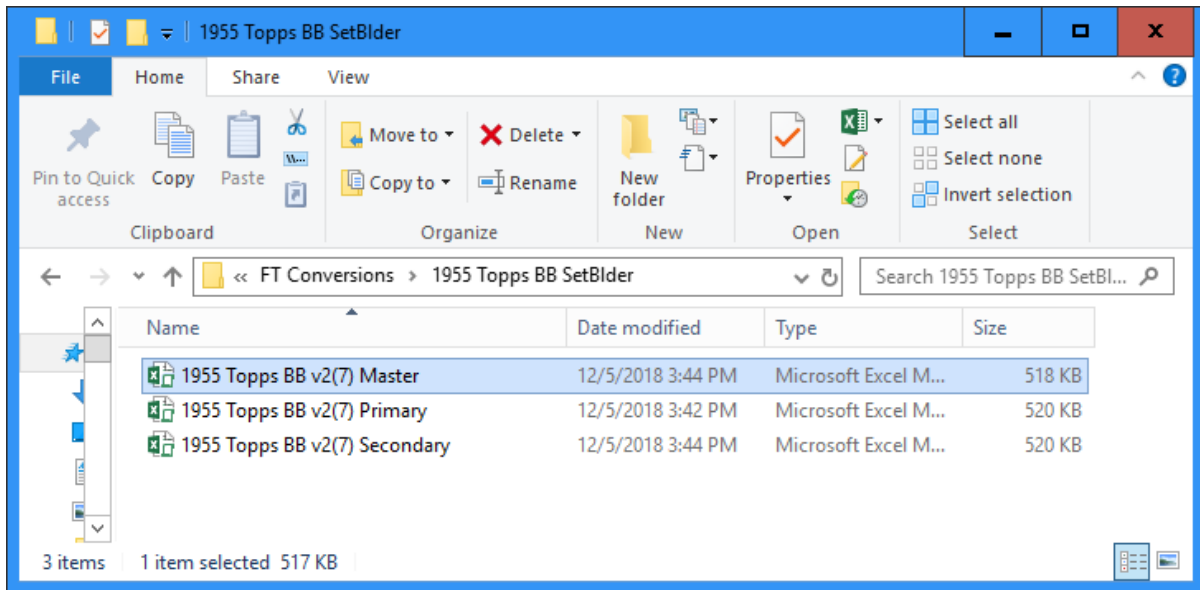

**Select one of your Free Trial (FT) Versions to Update and then Click Open**

**When the file conversion is complete – Name the Converted Workbook and Click Save**

**Repeat the same process for any additional FT Versions you have (in this case – FT Secondary)**

**Delete the Pre-Conversion FT Workbooks leaving only your Converted Workbooks**

**In this example both of my FT Workbooks have been converted into fully licensed versions  
and all of my existing Free Trial Version workbooks can be safely deleted.**
